

Bot Defense is Broken

Fraudulent AI bots are evolving exponentially, using sophisticated techniques to **mimic human behavior** and **evade probabilistic, legacy defenses**.

“Agentic AI bot progression poses risks we must prepare for”

– Managing director-Fraud, global financial institution

Use MirrorTab to protect:

- ✓ Password reset
- ✓ Onboarding
- ✓ Money movement
- ✓ High risk transactions

How MirrorTab Works

Starve bots of their source of power - data

Bots survive by siphoning on data streams - cease the supply

The human experience is unchanged via pixel stream vs. data

No more layers of defense. A new playbook for today's threats.

Deterministic protection against AI bots
